	Front / Surround: 68(W) x 166(H) x 95(D) mm
	Center: 150(W) x 66(H) x 60(D) mm
Power input:-----	Refer to the Voltage information on rear panel
Weight:-----	Approx. 4.5kg

**Edifier One Year Limited Warranty**

Edifier warrants to the end user that all of its computer speaker systems are free from defects in materials and of normal and reasonable use for a term of one year from the date of purchase.

This warranty is the exclusive and only warranty in effect relative to Edifier multimedia speaker systems and any expressed or implied, are invalid. Neither Edifier nor any authorized Edifier reseller is responsible for any incident incurred in the use of the speakers. (This limitation of incidental or consequential damage is not applicable with Edifier's obligation under this warranty does not apply to any defect, malfunction or failure as a result of misuse, use with faulty or improper equipment, or the use of the speaker systems with any equipment for which they were purchased. Under the terms of this warranty, the original consumer purchaser has certain legal right which vary worldwide.

**Troubleshooting**

■ **Not all speakers function:**

Phase first check if the speaker wires are connected securely;  
Then check if the Line-in connectors are reversed; check also if the audio source is at fault.

■ **One satellite speaker does not function when playing CD from computer:**

This kind of phenomena is prone to happen on new computer systems that one satellite does not function when playing CD, but system works fine when playing WAV formatted files.  
This is mainly due to the fault connection of CD-ROM and sound card, that one channel of signal is shorted to the ground.  
Please refer to the manual of CD-ROM and sound card to adjust the wire connection.

■ **System does not work at all**

1. Please check if power is connected, and if the wall outlet is switched on.
2. Please check if the amplifier is still in STBY mode
3. Please check if the master volume is turned to minimum
4. Please check if the audio input cable is connected correctly
5. Please check if there is signal from audio source

■ **Noise coming from speakers**

Amplifier circuitry of this product generates little noise, while the background noise of some VCD/DVD player or computer sound card are too high.  
Please keep the system in active mode and remove the audio source, if no sound can be heard at 1 meter away from the system, then there is no problem with this product.

■ **Magnetic interference**

This system is complete magnetically shielded, and can be placed near TV or monitor.  
But since magnet of the subwoofer driver is large, some magnetism leakage is inevitable when the system is too close to the monitor, and it is recommended to keep a 1 meter distance between the speaker system and monitor or TV set.
